1.2 Books Cited:

SHPM = *Someone Has Poisoned Me* Nico Kuyt’s original assault on common sense was published in 1998. Although this has been the war-cry adopted by the P-CON generals, they themselves admit Srila Prabhupada Never said it! Instead, the authorse just look for what they need to find and if it is not there, they just make it up! (atmavan manyate jagat)

KGBG = *Kill Guru Become Guru* = Nico Kuyt’s revised version 2 of his *Poison-Conspiracy hallucinations* released summer of 2017

SPHG = *Srila Prabhupada’s Hidden Glories* – This is a reprint of the KGBG document and it repeats the same foolish arguments exposed as irrelevant and contrived in the 2020 publishing of *DECEPTION*. It leverages the same diametric posturing which is very obvious by all the repeated commentary about arsenic which those behind this rumor abandoned as irrelevant as far back as 2002!.

PCA = *Poison Conspiracy Antidote* – Lampon that exposing just how absurd the *Poison-Conspiracy* rumor is. 2017 c/o mayesvara dasa

DECEPTION - 500 page book published in 2020 by mayesvara dasa exposing all the intentionally fraudulent propaganda that has been used to prop up the poison conspiracy since its inception.

¹As a convenience the “Poison Conspiracy” will be abbreviated as P-Con in this document.

7 Whose Smoking Gun?

Very large mats made of hair are used to absorb massive oil spills and clean up the ocean.

7.1 Buying Truth from “Truth Labs Script Vendors”?

The IFSPF-Fib-Site refers to the affidavits produced on September 16, 2024 as “*Vital and New*,” when, in truth, they are neither! Nonetheless, they are presented with the same pretentious authority used to praise Dr. Morris for his NAA work. The P-Con presents Dr. Morris as an individual with almost superhuman qualities, invulnerable to any mistakes. And, unfortunately, that attitude prevails over any logical discussion regarding Dr. Morris’ competency or thoroughness. Queries as to the absolute validity of his work are met with preposterous epithets accusing anyone inquiring about his work as simply being a “GBC AGENT! The excerpts below exemplify a few of the extraordinary attempts to prop up DR. Morris’ claims.

“To disparage Dr. Morris’ findings (see Ch. 51) is like barking at the Moon “-SPHG1 Chp 5 p36

“It is very unlikely Dr. Morris made an error in his calculations on the cadmium in Srila Prabhupada’s hair. He has done thousands of neutron activation analyses on tiny samples for several decades, and this is his unique expertise and in which he is superbly qualified.”
SPHG1 Chp 31 p142

“Dr. J. Steven Morris, at a high degree of professional scientific competence, followed rigorous procedure in his analysis and presentation of the results of Srila Prabhupada’s hair samples” -SPHG1 Chp 51, p256

Quotes like these imply that Dr. Morris’s reputation must be maintained at an almost demigod-like status for the P-Con ruse to even survive, largely because the P-Con clings to his research as irrefutable evidence of intentional cadmium poisoning, which it is not.

“The cadmium hair tests in 2002 and 2005 with Dr. Morris at the Missouri University Research Reactor have now proven as a scientific fact that Srila Prabhupada was poisoned with cadmium, at about 250 times above average normal levels. “ -SPHG2 Chpt 115. P54

from mayesvara dasa cont...

Curiously, Nico also insisted that Dr. Morris only interface with him. He demanded tight control over the entire exchange, i.e., what samples would get tested, who Dr. Morris would get his instructions from and how he was forbidden to interface with anyone else. Consequently, Dr. Morris's hair analysis *has never been confirmed* by any other professionally reliable source. The three samples he did test (*Samples A, D, Q-2*), which were alleged to have deadly levels of cadmium, were seemingly lost or intentionally destroyed! These suspicious circumstances and the lost chain-of-custody of these samples made it impossible to conduct any other tests for verification or follow-up.²

Clearly, Dr. Morris is a professional scientist, and, although he had never completed similar hair testing prior to the test of Srila Prabhupada's hair, he proceeded to look for results typical of a nuclear physicist with an NAA reactor. He was discerning enough to recognize that Nico's agenda required evidence of poisoning to support his claim of murder, Dr. Morris protected himself from Nico's ruse with the following *disclaimers* regarding the testing results:

7.2 The Omitted Disclaimers from Dr. Morris

Dr. Morris issued the following disclaimers in regards to the results of his NAA report:

- A.—He explained each element, e.g., cadmium, arsenic, required a different setting for optimum measurement.
- B. He notes the NAA reactor was set to detect arsenic, not cadmium.³
- C. He notes the testing parameters used for cadmium are not as favorable as they are for arsenic
- D. He points out the hair samples provided are exceptionally small
- E. He stresses: "...with cadmium we cannot detect a normal level in these small samples"
- F. He admits he actually stumbled upon the cadmium readings
- G. He admits he was "...refining his testing techniques"
- H. He acknowledges a large parameter of uncertainty inherent upon the results of the NAA testing, because of the extraordinarily small sample mass (0.00012 grams)
- I. -He admits he increased the neutron activation to more radiation than "normal"
- J. He also reports the vials provided, containing the hair samples, had their own intrinsic-presence of cadmium
- k. He also specifically said: "DO NOT RULE out the possibility of EXTERNAL CONTAMINATION"

It should also be pointed out:

- A. Dr. Morris absolutely should have been consulted prior to you or Nico jumping to the conclusion that his reports "Prove" intentional murder!
- B. This was actually the first time MURR equipment was used to analyze hair.

² This evidence *disappearing* is particularly suspect as a feature of NAA testing is that it does not destroy samples being tested. This NAA feature is confirmed. on Wikipedia and elsewhere: "A particular advantage of this technique is that it does not destroy the sample," https://en.wikipedia.org/wiki/Neutron_activation_analysis

³ It has been established that Dr. Morris set his NAA calibrations to look for arsenic. So any findings of cadmium can not be accepted as reliable because they would require different setting as per Dr. Morris's own testimony!

from mayesvara dasa cont...

- C. The samples Dr. Morris received were 1/80th the normally required size for such testing.
- D. The NAA process is lauded for analyzing samples without destroying them.
- E. After the report was issued, Nico reported that the samples were destroyed!
- F. NO explanation has been provided for why the samples were destroyed or lost!
- G. Dr. Morris was effectively under a gag order to communicate exclusively with Nico and no one else. Therein, a significant problem arises, as Nico’s published record of previously lying under oath in Superior Court makes even his public testimony dubious, at best. Nico’s subsequent malevolent publications may be seen in this light and suggest he is misrepresenting Dr. Morris’ hair study and analysis.
- H. Other than Nico’s interpretations, there have been no double-blind tests or any other tests to confirm the P-Con test results, which would be characteristic of most scientific study and analysis.
- I. No cross-examination or other hair analysis experts were consulted to confirm the methodology and findings of Dr. Morris. Again, because the samples were either lost or destroyed.
- J. At the time of Bhaktivedanta Swami’s passing, in 1977, there was no record of cadmium being used as a poison by anyone to commit murder. Thus, its carefully precise administration by devotees would be inconceivable.
- K. In 1977, cadmium was not even classified as a poison yet by any of the world’s regulatory agencies.
- L. How could a resident devotee know how to mix, evaluate, & administer cadmium poison with clockwork accuracy, when the world’s scientists had yet to declare their knowledge of such information
- M. Further critical examination confirms that it would be physiologically impossible to ingest the amounts of cadmium alleged without visible sickness and immediate damage.

HAIR MATS FOR OIL SPILLS
 RECYCLED, FELTED NATURAL FIBER MATS & BOOMS
 MADE FROM HAIR, FUR, WOOL, & FLEECE CLIPPINGS

HAIR BOOMS
 100% recycled natural fibers including hair, pet fur, wool & fleece clippings collected from salons, barbers, groomers, and ranches
 Tough, durable and planet friendly
 Multipurpose: ideal for oil, grease, diesel, gasoline, jet fuel

HAIR MATS
 High adsorption rate (oil adheres to the hair’s surface area)
 Mats are needle-punch felted with low carbon footprint
 Safe for the environment, see peer-reviewed research here
 (https://matteroftrust.org/research-resources/)

Description	Hair Mat for Oil Spill (HVAL)	Hair Matted Boom
Dimensions	60x90x2cm	120x30x2cm
UPC Number	0019832963102	0019832963330
Materials	Human hair, pet fur, alpaca, llama, bison, sheep	wool waste fibers
Manufacturer	Matter of Trust Inc.	
Item Weight	1.1kg (2.2 lbs)	
Absorption rate	5.5x (less oil)	
Absorption	Hydrocarbons derived from petroleum, oily, fatty, compound substances of mineral, vegetable or food animal origin

 Hair Eco-Entrepreneurs
 for Renewable Resources

The P-Con team not only does not disclose any of Dr. Morris’ disclaimers or these additional points; however, they do choose to stress:

Dr. Morris MURR Labs DISCLAIMER...

“External contamination cannot be completely ruled out without a detailed history of the sample; but one can search for possible sources of external contamination. In the instant case: I now have checked the containers the samples have been stored in and find no evidence of significant contamination sources for arsenic, cadmium, antimony, or mercury.”

Dr. Morris’s strict observations in his disclaimer equivocate upon the alleged high cadmium readings, admitting that external contamination must still be considered. So, instead of seriously listening to their experts warnings, the P-Con makes an attempt to negate their own expert’s carefully crafted disclaimers with several pages dedicated to convince readers to accept the simplest and most lurid conclusions:

“Concern about misleading results due to external contamination, in no way invalidates the science of hair analysis.” -SPHG1 Chpt 46. p218

And, while it may true that external contamination does not invalidate the science of hair analysis on the whole, it does have particular relevance in this case!

Hair analysis and toxicology confirms that hair absorbs what is in the environment almost like a dry sponge absorbs water. ⁴

⁴Hair Matters’s Amazing Idea of Using Waste Hair To Clean Oil Spills It is unrealistic to claim that hair is not extremely susceptible to external contamination. <https://www.evtomato.com/quickthought/hairmatters>

from mayesvara dasa cont...

That is why hair is sometimes used in bioremediation and water and soil projects, because it can absorb heavy metals, like those found in dangerous oil spills.⁵ Armed with the knowledge that hair is strategically used specifically for the purpose of absorbing external environmental contaminants, it is negligent for the P-Con to insist that the dubitable hair samples could not have absorbed detectable amounts of cadmium, either from the sample containers, chain-of-custody contamination, collection tools, the misinterpretation of NAA results or even air-borne cadmium. Atmospheric cadmium is a common pollutant particularly in countries where incense is burned for ceremonial purposes. When studied, incense smoke has been found to be correlated to respiratory ailments because it includes several heavy metal pollutants including cadmium!⁶

7.2.1 Cross Examination of Dr. Morris's NAA Results

To date, the only review of Dr. Morris' work is the narrative I present in **DECEPTION**. There has been little transparency to Morris' reports, no peer review, and no "double testing," as insisted upon by Dr. Pillay Head Toxicologist, Kerala, India (see below). Of course, while all of this is elementary to medical claims and criminal discovery you jump to crucify Tamal Krishna Goswami at the *first* opportunity, betraying both scientific sensibilities and common decency!

Double Blind Testing Imperative! How is it that you have such abnormally high levels (of cadmium) and you are not only surprised but flabbergasted? How is it a person survive with such a concentration in his system?... Double testing should have been done, and preferably *the 2nd test should not have done by the same laboratory, but by another accredited laboratory* where I told you the thing should have been blind. ... I don't find that a second laboratory was involved... *I am not very convinced that this is actually reflective of high concentration of cadmium of this kind of person's body which contributed to his death.*
Dr.V.V. Pillay - Head of Analytical Toxicology AIMS, Cochin, Kerala

This illogical and insensitive condemnation is hardly the behavior of an honest man. Conversely, it appears to be negligent, vindictive, criminal, personally motivated and slanderous! However, these characteristics do explain why the disclaimers from Dr. Morris have been intentionally withheld.⁷

Nico's tampering made it impossible to conduct a second testing of the hair that alleged preposterously excessive values of contamination. Is it possible the samples which characteristically remain intact under NAA analysis were conveniently destroyed? Again, only Nico knows.

⁵ **Matter of Trust** makes environmental clean-up mats out of human hair, which acts like an environmental sponge capable of absorbing more than five times its weight in pollutants. <https://matteroftrust.org/contact-us>

Also: <https://fortunesrown.com/human-hair-mats-that-soak-up-oil-spills-a-solution-to-keep-waterways-free-from-pollution/>

⁶ Following the respiratory ailments^{38,42}, this study: (a) conducted a survey on the marketed incense apportioned in the six Kuwait Governorate areas, (b) analyzed selected trace metals of importance such as chromium (Cr), nickel (Ni), lead (Pb), Arsenic (As), Vanadium (V), and cadmium (Cd) in the perfumed and non-perfumed, smoldered and non-smoldered incense, (c) surveyed using a questionnaire to assess the pollution impact and contributing factors of the frequently used incense by the indoor residents and, (d) deduced the possible alleviating measures to respiratory ailments. -National Library of Medicine, Introduction: <https://pmc.ncbi.nlm.nih.gov/articles/PMC8140077/>

⁷ Because Nico dominated the interface with Dr. Morris, it is reasonable to presume the good doctor perceived what Nico's agenda was and how unstable it was. . Bring well educated, Morris was likely wise enough to understand he could be dealing with an unpredictably narcissistic personality, so he was very careful not to provoke him. To protect himself and the reputation of MURR labs, he released all these disclosures along the way. Honest research includes the responsibility to heed the cautions Dr. Morris provides, but, instead you, Nico, and Naveen have done all you can to keep- all these disclaimers hidden from the public. Why have you done that?

from mayesvara dasa cont...

*“Besides its high sensitivity, NAA's **potential for nondestructive measurement** provides the further advantage that the samples which are measured can be preserved **for production in court or for further tests.**”⁸”*

The very same type of suspicious and calculating behavior is evident in your veiled evasions of Sitapati's more assertive questions. Your robotically and repetitive responses to Sitapati's questions, insisting that Truth Labs was sophisticated and professional, was a clever way to avoid answering the more significant and relevant questions. You just robotically repeated how Truth Labs was sophisticated and professional, thus avoiding any thorough answers.

Example of your sophistry are evident in your assertions::

*1:48:17 ...there is **audio forensics voice print analysis**...the whispers...*

*1:49:39 (this audio technology) **is as sophisticated as it gets**...*

*1:52:23(stalling)umm.. **I know that Truth labs analyzed many conversations...not just from that time period, not just these 23 minutes... umm, you know, so it's how much I know Truth Labs spend hundreds and hundreds of hours on this..***

*1:52:54 you asked me.. so here is what it is... **here is the forensic evidence***

*2:08:25 **Toxicologists have analyzed hair samples**⁹ and concluded on average 250 times cadmium above normal. **Top forensic toxicologists.. concur that the only reasonable explanation is deliberate homicidal poisoning.**¹⁰*

*2:12:07 so again, **world class forensic laboratories I'm going to say like forensic professionals, I mean like when these for example when the top courts want an expert witnesses they will call these professionals***

*2:13:40 and so, At some point **these top forensic scientists they decided, they didn't think to test for cadmium at first, then they thought lets now test for cadmium. .. and wow... that's what happened...***

What you fail to disclose is the apparent Machiavellian tactics Naveen Krishna must have employed just to get Truth Labs' to provide the so-called sophisticated, expert, and irreproachable documents! These and other similar details being omitted distinguishes the difference between a person of integrity, and those willing to do whatever they must, to get whatever they want, especially when they cannot obtain what they want honestly.

The Truth Labs *“Salient Features”* document you praise so highly is categorically disingenuous, especially when one considers the apparent ghostwriter when the content is studied carefully for repeated phrases. The Truth Labs document does represent a smoking gun, but not for proving the P-Con's accusations. What it proves is that Naveen gave Truth Labs material written by Nico and then hired their “experts” to rubber-stamp the propaganda he gave them with their Truth Labs logo!

As proof of this dishonesty, I provide a detailed line-by-line comparative study where this ghostwriting or plagiarism is patently obvious. This alone fully exposes the Un-Truthful aspects of your forensic “experts,” and the deviousness of Naveen Krishna, and how cunningly manipulative and dishonest you and all of the P-Con shysters have become, as well!¹¹

ILLUSTRATION ON NEXT PAGE...

⁸ -Dennis S. Karjala, "Comment, the Evidentiary Uses of Neutron Activation Analysis", California Law review 59, http://papers.ssrn.com/sol3/papers.cfm?abstract_id=1438160 997,

⁹ Dr. Morris is NOT a Toxicologist, he is a physicist! He warned NOT to eliminate possibility of External Contamination!

¹⁰ Which top forensic toxicologists are you referring to & where is their affidavit or when did they testify?

¹¹ T-Labs Nico 8 Clauses.pdf & T-Labs One Big Clause.pdf

File No. TLH/ML/001/2024

- b. Cadmium is a naturally occurring toxic heavy metal that interferes with the functioning of some of the basic chemical processes that sustain life.
 - c. It is present in only trace amounts in the environment.
 - d. Cadmium is a cumulative poison due to slow excretion from the body.
 - e. About 10 mg of ingested cadmium causes severe toxic symptoms.
 - f. Cadmium causes renal tubular damage, leading to overall physical deterioration.
 - g. Cadmium is carried through the blood and gets deposited in the hair, and the amount of cadmium deposited in the hair depends on the corresponding blood level at the time of deposition which varies with the poison ingestion time.
 - h. Cadmium poisoning is irreversible.
 - i. There is no antidote or chelation therapy for cadmium poisoning.
 - j. Cadmium has no known beneficial effects on human physiology.
 - k. Ayurvedic drugs do not contain cadmium.
 - l. The possibility of cadmium contamination interfering with the presence of cadmium in hair samples is remote as the MSDS data of Wahl Clipper oil which only contains white mineral oil with no chance for the presence of cadmium or any other metallic toxic components.
 - m. The possibility of cadmium contamination in body massage oils is ruled out as per the data given for organic oil compositions of natural organic medicines extracted from medicinal plants marketed as ayurvedic drugs, only contain organic essential oils with no chance for the presence of cadmium or any other metallic toxic components.
- 5.3 Cause of death appears to be intricately linked with Cadmium poisoning:
- a. Even trace quantities of cadmium, arsenic, mercury, antimony, lead, etc. are prohibited in nutritional supplement preparations and in fact are banned from use, as they are considered potential neurotoxins that would affect multiple organs.

Dr. Gandhi PC Kaza Dr. D. M. Ravichand Dr. M. Narayana-Reddy

INDIA'S FIRST INDEPENDENT FORENSIC SCIENCE LABORATORY ISO 9001 : 2015 CERTIFIED

reached. Further to this, we note that poisoning by arsenic, since it is quickly excreted, requires regular doses, whereas poisoning by cadmium, being cumulative and with a half-life of 17-30 years, can become fatal quickly. (2) Cadmium is so poisonous that even 10 mg ingested has caused severe toxic symptoms. (Rumack BH: Poisindex Information System) A lethal dose is about 0.5 grain or 30-40 mg cadmium, less than the 300 mg arsenic required, and is the weight of a small postage stamp. This translates to 0.035 grams or 0.001235 ounce. (3) Cadmium is a general metabolic poison and competes (replaces) with zinc, disrupting essential biological processes. Ingested cadmium is primarily deposited in the kidneys and liver, with a very limited amount being carried by the blood and excreted through the urine. Since the amount of cadmium deposited in hair depends on the blood level of cadmium, hair cadmium is like the tip of the iceberg as to the actual total body burden. (4) A 2000 study in Belgium by MK Vlaene et al stated that "animal studies have shown that cadmium is a potent neurotoxicant." Its cumulative toxic effect simply depends on the amounts ingested. (5) The target organ for cadmium toxicity via oral exposure is the kidney. Cadmium causes irreversible renal tubular damage, which progresses into complete Fanconi syndrome with decreased tubular reabsorption of proteins, glucose, amino acids, calcium, phosphorus, with decreased ability to acidify, concentrate the urine. (6) Renal tubular dysfunction and proteinuria (in kidney) results in overall physical deterioration. Rather than assimilate nutrients, minerals and protein, the kidneys allow them to pass out with urine, with whatever stores are already in reserve. Leaching due to sufficient cadmium poisoning (protein, sugar spilled in the urine) denies the victim any sustenance and slow death follows with the appearance of malnutrition, starvation, indigestion, diarrhea, vomiting, stomach pain, etc. (This was exactly Srila Prabhupada's condition...see medical history)

(7) Cadmium poisoning is irreversible; there is only medical chelation therapy and no antidote. (8) Cadmium has no known beneficial effect on the human physiology. (9) Daily excretion of cadmium is about 0.01% of the total body burden; cadmium has a half-life in the body of 17-30+ years (how long to excrete half of what is in the body). Cadmium's half-life in the blood is 3-4 months, which is deposited in the hair as it grows. (From ncbi.nlm.nih.gov/pmc/articles/PMC5596182) (10) Normal cadmium concentrations in the adult kidney cortex is about 50 ppm and when it reaches 200 ppm a critical threshold is reached wherein the body no longer can manage it, and disease then develops, including serious kidney dysfunction and failure. (Srila Prabhupada's condition, exactly) (11) Cumulative effects of cadmium continue after exposure ends; disease then tends to be progressive. Once sufficient cadmium is chronically ingested, death will follow from disease progression. (12) Long-term chronic cadmium poisoning results in various bone diseases, and prostate and lung cancer are also suspected. The liver and cardio-vascular system are also adversely affected by cadmium. (13) Cadmium intake is distributed widely in the body but accumulates mostly in the liver and kidneys. It binds to protein and non-protein sulfhydryl groups and various macro-molecules such as metallothionein, affecting especially the liver and kidneys. (14) Because the toxic effects of cadmium are a function of a critical concentration being attained in the kidneys, similar effects will occur following long-term poisoning at low levels and short-term poisoning at high levels. Kidney and liver toxicity can occur with toxic cadmium levels accumulated even by sub-chronic exposure. (which is why it was not recognized by so many "short-term" doctors) (15) Breathing difficulties and emphysema develop in longer exposures, as much as 10 years later at low-level chronic levels. (In the months before Srila Prabhupada's departure, some doctors were focused on his lungs, and this is consistent with cadmium poisoning symptoms.) (16) The IARC regards cadmium as cancer-causing due to chromosomal aberrations in the blood lymphocytes and lesions in the central nervous system, liver, and kidneys, and causes eosinophilia, a blood disorder. (17) Cadmium is one of the most dangerous environmental nephrotoxic agents, causes loss of hearing/eyesight, kidney stones, and decreased density/weakness in bones, and alters calcium metabolism. Arsenic, lead, mercury, cadmium, and antimony are naturally occurring toxic heavy metals which interfere with the function of the basic chemical processes that sustain life. (8) It is present only in trace amounts in the environment.

Srila Prabhupada Hidden Glories (Nicas 1st Book with no page numbers! Why?)
 Ninth Expert Opinion:Scientific Studies / Pathology & Toxicity

7.2.2 Unkept Promise or Just More DECEPTION?

You may have made the following pledge, but your credibility has collapsed just like Nico's, and for some of the same reasons. You claim:

"I will work to ensure that a fair and professional investigation is conducted." -KGBG p108

In fact, neither you, Naveen, or Nico have been either fair or professional regarding any aspect of the so-called P-Con investigation, as this recent P-Con canard details:

"Why don't they (the GBC) do one or two honest scientific tests instead of so much denying? Let the evidence speak for itself? But they fear the truth too much. The real scandal of the poisoning is highlighted further by ISKCON's determined suppression of the hard evidence." -SPHG2 Chpt 115. P54

ISKCON, the GBC, myself, and others are quite convinced that there is absolutely no evidence that you, Naveen Krishna or Nico would accept as proof Srila Prabhupada was NOT poisoned. I have cited academic research, presented court worthy evidence, given numerous examples of intentional DECEPTION, and itemized 20-pages of important questions about the P-Con, all of which you have ignored dismissed or fail to understand.

This type of evidence is adequate to convince an unbiased audience that Srila Prabhupada was not poisoned, yet you and your bodacious "NO-Truth Team" continue with your vicious campaign. For the record I request that you please tell the reading audience what it is we need to present that will convince you and your P-Con colleagues that this terrible rumor is unfounded?

from mayesvara dasa cont...

Your response to any of our inquiries has always been nasty and filled with accusatory comments such as this derogatory epithet:”(The book DECEPTION is...) filled with off-the-wall lies, distortions, and crooked deception ad nauseum... false narratives, fake facts... & destroying evidence”. -SPHG1 Chpt 43. P203 What lies, distortions and fake facts are they referring to here?

Your refusal last January to attend the “Truth Summit” that Garuda went through great difficulty to arrange in your hometown, Alachua, also confirms that it is you who fears such evidence and are intent on suppressing any oppositional hard evidence.

No matter how detestable you consider ISKCON or its members to be, that is no excuse for the uncharacteristic lack of integrity you have engaged in to prop up this stupid rumor. Your inability to handle your grievances reflects an immaturity that disgraces your stature. Consider the grievances the Dalai Lama has to contend with China. The Chinese have polluted Tibet, destroyed its native temples, razed its cities, murdered hundreds of thousands of his disciples, and chased him out of his home in 1959. Yet, when asked how he endures such travesties he responded:

268 *The road to happiness is rigged with land mines. These are destructive emotions that cause pain and suffering and can be triggered at any time by people whose minds are not trained to apply antidotes to overpower the negative with the positive.*

135 *If the mind is dominated by hatred, the best part of the brain, which is used to judge right and wrong, does not function properly.* <https://travishellstrom.com/dalailama>

Dhira Govinda, your discipline is not limited to building your own independent Satvatove vocation. It should include looking at how your hatred and pride has implicated you in so many dishonest and disgraceful habits and practicing what you preach! Your live has morphed from glorifying Krishna’s Devotees, to waging war against them. Would Srila Prabhupada be pleased with how you insult his disciples and accuse them of murder based on hearsay and nothing more than just twisted emotions? Instead of destroying Prabhupada’s dream, it would be more auspicious for you find those who you can work with cooperatively to develop and help promote ISKCON, which he considered to his body

You have so much more potential to share than these twisted distortions of reality. Why lower

Srila Prabhupada Hidden Glories (Nicos 1st Book with no page numbers! Why?)
Chapter 34: Malicious, Homicidal Poisoning / The Plan & Methodology

was punctuated with periodic more potent “surprise” doses, all to discredit and evade all doctors and medicines, both Ayurvedic and allopathic. Access to Srila Prabhupada in person or by mail for everyone but a few caretakers was severely restricted. The unexplained mysterious, progressive health decline was portrayed as a divine pastime-lila to deflect any inquiry. Cadmium and arsenic are “masquerade” poisons; they are virtually undetectable. Chronic cadmium or arsenic poisoning causes a physical condition which appears typical to old age and therefore arouses little suspicion. It is a state of chronic invalidism and chronic starvation. Srila Prabhupada suffered a severe cadmium poisoning of virtually unprecedented, catastrophic proportions. There was a plan for the homicidal cadmium poisoning as described below.

METHODOLOGY

The cadmium poisoning was an extended ingestion of small amounts of cadmium with insidious, hidden, deadly effects and then sometimes punctuated with heavier or more acute doses. The hair tests and medical history of Srila Prabhupada show that the poisoning was chronic over a period of up to 18 months. (see next chapter) Knowledge of poisoning methodologies was available in the 1970’s from the stock of available literatures and medical research. The discovery of Napoleon’s

6.4 Evidence of NAA analysis reveals slow poisoning with heavy metals, primarily the cadmium, the effects of which mimic the symptoms of diabetes and kidney disease thus not arousing the suspicion of poisoning, especially when administered in low dosages for about 18 months, combined with heavy doses intermittently.

6.5 Cadmium and Arsenic are “masquerade” poisons which are not detectable in routine tests. Chronic cadmium or arsenic poisoning cause physiological conditions which are typical of old age and, therefore, arouse little or no suspicion and the condition of the patient is similar to that of a person suffering with chronic starvation.

yourself into a world where rationally-crippled audiences define who *you* are. Krsna has given you badly needed and valuable talents, but you run the risk of losing everything if you continue to blaspheme Vaishnavas!

“Some people assume that it is not an offence to criticize a sādhu who has engaged in an objectionable activity, because one is only stating facts. But Śrīla Śrīdhara Svāmīpāda has written in his commentary on the 208 Third Shower of Nectar – Text 2a Śrīmad-Bhāgavatam, “nīdanaṁ doṣa-kīrtanam – whether the criticism is based on fact or not, the vocalization of a saintly person’s faults is nonetheless counted as nīdā (blasphemy).” -Narotam

Dasa Thakura, Madhurya-Kadambani, Third Wave, p. 208.

Regardless of how terrible you may feel ISKCON is, it does not come close to how badly China abused the Dalai Lama and his people! Yet by comparison, he is much more compassionate, diplomatic and mature than the example you have set for all those who look up to you for leadership qualities.

Get your Mad Elephant under control and redeem yourself from following the tsunami of insults you have published on

the IFSPF-Fib-Site with a long overdue, genuine mea-culpa. There is no shame in admitting that you have been deceived by Nico. That would be the most honorable thing you could do at this juncture, and it would likely break the Svengali-like Trance he has on your astute brain and devotional heart.

For 25 years Nico has *incorrectly* claimed that Srila Prabhupada actually said he was poisoned, not just once, but three times:

“Our records show that Srila Prabhupada said something else, namely “Someone has poisoned me,” three times,” -KGBG 281

Has your bitterness blindly moved you to repeat Nico’s rancorous propaganda without ever checking to see if it is true? When I began to study the P-Con poison allegations, I had no idea how psychologically fraught Nico was, but I gave him the benefit of the doubt and trusted him when he wrote:

“I am open to being corrected and chastised by anyone. I have tried not to be prejudicial in this presentation of evidence, and I ask for pardon if that has not been accomplished.” -SHPM 292

However, I immediately discovered that his disingenuous posturing was simply a surreptitious attempt to gain temporary credibility. There was evidence everywhere that he would misrepresent whatever he needed to support his vainglorious P-Con-Script. I soon realized the need to verify each and every claim he made, because, on many occasions, his claims were either taken out of context, plainly incorrect or completely fabricated! The **DECEPTION** was so ubiquitous it became obvious that would be the best title for my book! The name emerged as I uncovered countless examples of intentional DISHONESTY over and over again, each being used in an attempt to prove an impossible crime that never could have happened!
